Resources

Where can I get resources?

You can start by visiting my [GitHub wiki site](#).

The screenshot shows a GitHub wiki page for the repository 'Joscelinrocha / Learning-R-resources'. The page title is 'Learning-R-resources'. The content discusses the author's experience with teaching R and maintaining a private Trello board for resources. A large yellow triangle graphic at the bottom contains the word 'FUN'.

Since I got introduced to R, I have been accumulating resources that could help me and others in this process. In the past two years, I have taken the role of teaching R to people in my lab and university. Last semester I, for the first time, opened my class to people outside of the school. It was an incredible experience, and I would like to continue doing it.

I used to keep track of these sources in a private Trello, but honestly, why should I just keep it to myself? I hope it helps you all!

You can visit the [Rstudio Education site](#):
<https://education.rstudio.com/learn/beginner/>

The screenshot shows the 'Beginners' section of the RStudio Education website. The main visual is a large, stylized cheese wedge with a small figure standing on top, representing a starting point for learning. To the right, there are sections for 'Resources' and 'Books'.

Beginners

No one starting point will serve all beginners, but here are 6 ways to begin learning R.

Cheat Sheets

Books

Have Fun!

It may be frustrating at first but it gets better 😊!
